

New Left Review (On the new Leader, Sirohi and his relation to Louis Althusser and also us in English Marxism)

By Perry Anderson

Part I - The Originals

I. A Brief Review of the Years, 2019 - 25 - Sirohi and Indian Revolution

By Perry Anderson

In fact it began in 2019, the Indian revolution which Sirohi was on communication with Saroj and even Michael and then comes in fact the great few years of 2020 - 23 which was begun with uncertainty for Sirohi though he did do a fine introduction to his lectures and topics way of life and was always philosopher and then came the great and perfect year 2022 - 23 where in fact he became objective and certain and in fact was living creatively and all the philosophers as well as Louis Althusser joined him. In the sense of Andersonianism, I argue this brief review then changes in 2024 to a distressing year, which was another year recently in 2025 as with two good months and then fever in the last few months of curation crisis in the ending of 2025 and this then becomes in three simple periods -

- I. 2019 - 2022 - a Period of Revolution and Lecturing
- II. 2022 - 23 - a period of high happiness and full objectivity and self-certainty which was in fact in comic book reference "Such heights that even love was pronounced as highest contemplation of Incubism and sex", even "perfectly without an identity crisis, perfect, perfect."
- III. By 2024 - 25, a crisis
- IV. 2025 - two months of again the highest perfection.
- V. Recently in 2025 fever and curation crisis and fever again after the curation was done.

II. A Real Heroe

By Walter Rodney

In fact then always fine I suggest. Sirohi is even now fine, I call self-identity and such experience that he is going into crisis on as also not in crisis. Sirohi is himself and fine throughout. He is always fine. I also mean in footage he comes across as a major leader. I also mean in footage he can be seen as a vertical and aligned actor and has always also been a real leader and a real heroe. I also mean he has been fine and perfect throughout, it is just how time passes by as Heidegger would

argue. I also mean he is not printing this edition, he needs it for himself only. He should print it, we get our news this way.

Sirohi can be seen saying "I am finally fine and finally perfect and objective." He is also seen doing creative things. And is very creative throughout.

Part II - Andersonianism

I. A More Objective History

By Perry Anderson

An objective history then would be of peasant revolt and Aanganwadi workers in resistance and even working class mass poor Shanghai Commune. And even then the leader Sirohi as always leading the people and with no crisis at all. He is in fact then in crisis for a year and then seen to be fine and is still fine according to most people and is also seen as really creative and is also in an Andersonianism, something that CPSU calls a objective leader.. All this is how history then was at all times in an inter-tanglement with Cuba, Algeria and China and this was also then the process of their successes.

II. My Recent Life

By Shomit Sirohi

I have been fine throughout and doing philosophy. I have been actually a philosopher throughout. First the introduction to my lectures and then a course on Hegel in the 2023 period and then in fact daily life in a Christian sense throughout which then has all been Spiritual. I mean in fact most accounts miss how I have been in fact in Gospel heights and also as Cornel West argues in jazz dynamics. This is missed because all accounts are too much about in fact my recent crisis, earlier we were saying mostly jazz and just that. I was in fact seen throughout the period as a dialectician as well. That period of uncertainty was for me Talmudic and happiness of Soviet type or Gaze and Voice as love objects like - it was like a weight of things and perfection in life as well.
